**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-27, drawn to a smoking system, classified in class 131, subclass 194.
  - II. Claim 28, drawn to a method of making a cigarette, classified in class 131, subclass 281.
  - III. Claims 29-47, drawn to an apparatus/method apparatus for perforating a tobacco rod prior to assembly of the tobacco rod to a filter rod, classified in class 131, subclass 281
  - IV. Claims 48-59, drawn to an apparatus/method for manufacturing a cigarette, classified in class 131, subclass 282.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions and modes of operation. Invention I functions as a smoking system, which is different from the other inventions because it requires a cigarette and a lighter being mutually arranged. Invention II functions as a method of making a cigarette, which is different from the other inventions because it requires punching a row of holes along material with opposing rollers. Invention III functions as an apparatus/method for perforating tobacco

Art Unit: 1731

rod prior to assembly of the tobacco rod which is different from the other inventions because it requires a drum link-up assembly and an laser perforating means which includes a beam splitter and a means to rotate the tobacco rod about its axis while pulsing a laser to burn holes therein. Invention IV function as an apparatus/method for manufacturing a cigarette, which is different from the other inventions because it requires a combining apparatus; tipping apparatus and transfer apparatus linking the other apparatus.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II, III, IV and the search required for Group II is not required for Groups I, III and IV, etc., restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
